

## WK-S2A2-E Ergonomic Standing Hand Crank Single Lever Lift Desk

### Features

WK-S2A2-E ergonomic standing hand-crank single-pole lift desk is a hand-crank lift desk. The product has a load-bearing capacity of 60KG, a stroke of 450MM, a frame height of 700-1150MM, a frame length of 860-1330MM, and a hand-cranked length of 12MM. It has the protection function of rebounding in case of resistance.

WK-S2A2-E ergonomic standing hand crank single lever lift desk has a simple appearance and is mainly used in offices. The product is easy to operate, and the worktable can be lifted and lowered only by turning the hand crank. It is a good choice for those who want to experience the lifting table with a limited budget.

The hand-cranked desk is easy to raise and lower, and can satisfy people of different heights. It is ergonomically designed to provide users with a suitable height for use and improve the efficiency of work or study.
